- National Podiatric Medical Association

SUMMARY OF EXPERIENCE

Dr. Pacada treats athletes at all levels, including children who play league sports. He joined HMF after working with an internationally recognized expert in sports medicine and injury prevention.

Before college, he was a physical therapy technician in the U.S. Army. He was based in San Antonio, Texas and helped soldiers and civilians recover from injuries.

ON A PERSONAL NOTE

Dr. Pacada stays in shape by working out first thing in the morning, running marathons, and participating in occasional fitness “boot camp” programs.

He used to play baseball, but now that he and his wife have three children, he serves as a volunteer coach for baseball and soccer.

He has served as a consultant to the Los Angeles Marathon and the Avon 3-Day Breast Cancer Walk, and is a director for Life with Diabetes in Los Angeles.
